Book Club Reading Challenge & Discussion Portal

Lab 1 - Requirements Engineering

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale	Comments
FR-001	Functional	The system shall allow Club Members to join available reading challenges.	High	When a Club Member selects an available challenge and chooses "Join", the challenge shall be added to the member's active challenges and a confirmation shall be displayed.	Core reading challenge functionality.	Clearly defines the member action and expected result.
FR-002	Functional	The system shall allow Club Members to record and update their reading progress for books in an active challenge.	High	When a Club Member enters valid reading progress, the system shall save the value and display the updated progress percentage.	Required for tracking challenge progress.	Acceptance criterion is measurable; progress format could be specified if required.
FR-003	Functional	The system shall allow Discussion Leads to create discussion sessions for books.	High	When a Discussion Lead enters a book, topic, date and time, the system shall create the session and display it in the discussion schedule.	Core discussion functionality.	Specify that the date and time must be valid and future-dated.
FR-004	Functional	The system shall allow Club Members to post comments in an active discussion session.	High	When a Club Member submits a non-empty comment, the system shall display the comment with the member's name and timestamp.	Enables community discussion.	Clearly defines the required input and displayed output.
FR-005	Functional	The system shall allow Discussion Leads to moderate comments in discussion sessions.	Medium	When a Discussion Lead removes a comment, the comment shall no longer be visible to other users.	Helps maintain appropriate discussions.	Specify whether the removed comment can be restored.

NFR-001	Nonfunctional	The system shall display reading challenge and discussion pages within 3 seconds for at least 95% of requests under normal operating conditions.	High	At least 95 of 100 test requests shall receive a complete response within 3 seconds.	Ensures acceptable system responsiveness.	Response-time limit and measurement method are clearly testable.
NFR-002	Nonfunctional	The system shall require authenticated users to log in before accessing member-specific reading and discussion functions.	High	An unauthenticated user attempting to access a protected function shall be redirected to the login page in every test attempt.	Protects member information and discussions.	Clearly defines authentication requirement and pass/fail condition.

Book Club Reading Challenge & Discussion Portal

Use-Case Flow - Join Reading Challenge

Use Case: UC-01 – Join Reading Challenge

Primary Actor: Club Member

1. Club Member opens the Book Club Reading Challenge & Discussion Portal.
2. Club Member selects the "Reading Challenges" option.
3. System displays the list of available reading challenges.
4. Club Member selects a reading challenge.
5. System displays the challenge details.
6. Club Member selects "Join Challenge".
7. System verifies that the Club Member is eligible to join the challenge.
8. System adds the challenge to the Club Member's active challenges.
9. System displays a confirmation message.
10. Use case ends successfully.

Alternate Flow - Challenge Already Joined

1. At Step 6, the Club Member selects "Join Challenge".
2. System detects that the Club Member has already joined the challenge.
3. System displays a message stating that the challenge has already been joined.
4. System does not create a duplicate challenge entry.
5. Use case ends.
